PROFESSIONAL SUMMARY

Full-stack .NET developer with a strong ASP.NET Core backend focus and deep expertise in Clean Architecture, CQRS, and secure RESTful APIs. Contributed to freelance projects for a Kuwait-based client, including payment-gateway integration and bilingual enterprise dashboards. Skilled in Blazor for .NET ecosystems, with solid working familiarity in modern frontend frameworks like React and Angular. Backed by solid field-training experience with UNRWA (Outstanding evaluation) and Developers Plus.

TECHNICAL SKILLS

Backend: C#, .NET 8, ASP.NET Core, Web API, MVC, Razor Pages, SignalR, background services

Architecture & Quality: Clean Architecture, CQRS, MediatR, FluentValidation, JWT authentication, role-based authorization, ASP.NET Core Identity

Data: PostgreSQL, SQL Server, Entity Framework Core

Integration: REST API integration (RestSharp), payment-gateway integration and webhooks, AWS S3 file storage, email (MailKit)

Frontend: JavaScript, TypeScript, jQuery, AJAX, HTML5, CSS, Bootstrap, jQuery DataTables, Chart.js

Tools & Delivery: Git, GitHub, GitHub Actions, CI/CD, Docker, Azure DevOps, Swagger

SELECTED FREELANCE PROJECTS

Monera Connect API May 2026 – Aug 2026

Freelance Backend .NET Developer | Kuwait-based client

Backend API for a consultation-booking and digital-resources platform, developed with a small team.

- Built features in an ASP.NET Core (.NET 8) Web API using Clean Architecture and CQRS, with MediatR handlers and FluentValidation in a validation pipeline.
- Developed the order and checkout flow for digital resources, integrating the Upayments gateway: charges, invoices, payment-status checks, a payment callback endpoint and manual transaction updates.
- Implemented JWT authentication with refresh tokens, role-based endpoint authorization, and OTP send/verify endpoints.
- Worked on consultation appointments (scheduling, approval, rescheduling) with email notifications, plus customer inquiries and resource and blog management.

Stack: C#, .NET 8, ASP.NET Core Web API, EF Core, PostgreSQL, MediatR, FluentValidation, JWT, AWS S3, MailKit, Serilog

QRCode App May 2025 – Sep 2026

Freelance Full-Stack .NET Developer | Kuwait-based client

Multilingual (English/Arabic) admin dashboard for managing shops, branches, dining tables, menus and QR codes, developed with a team.

- Contributed to a .NET 8 Razor Pages dashboard in a layered solution (Web, Application, Domain, Infrastructure, Shared) that consumes a separate backend REST API.
- Integrated the backend through RestSharp and HttpClient with a delegating handler that attaches JWT bearer tokens; cookie authentication carries the token, with expiry handling.
- Worked on role- and permission-based access control, including authorization policies and subscription-plan checks in middleware.
- Built menu management features: Excel menu import (ClosedXML), Dropzone file uploads and DataTables listings.
- Added third-party delivery and payment-gateway integrations, with SignalR notifications.

Stack: .NET 8, Razor Pages, RestSharp, SignalR, ClosedXML, DataTables, Dropzone, JWT and cookie authentication

PROFESSIONAL EXPERIENCE

.NET Developer Trainee Sep 2023 – Dec 2023

Developers Plus (field training placement)

- Contributed to a Job Portal web application built with ASP.NET Core, working in a development team.
- Implemented real-time notifications and chat using SignalR.
- Built user authentication and authorization.
- Developed a responsive, interactive front end with Bootstrap, JavaScript and jQuery.

Full-Stack .NET Developer Trainee Jul 2023 – Aug 2023

UNRWA – IMT Department, HQG, Gaza (competitive field training placement)

- Selected through an interview process for a competitive field-training placement; received an Outstanding evaluation in the official evaluation report on completing the training.
- Built an Employee Attendance System with ASP.NET Core during the training, including background services for automated attendance tracking.
- Implemented real-time chat using Chatapex.js.
- Built a responsive Bootstrap 5 interface with dynamic JavaScript and jQuery functionality.

ACADEMIC PROJECT

Elderly Management System (graduation project) Feb 2023 – May 2023

Gaza Training College, for Wafa Association for Elderly Care

Led the student team (planning and task distribution) and built an ASP.NET Core system with authentication and authorization, CRUD for elderly records, and dashboards with DataTables and Chart.js.

EDUCATION

Diploma in Programming & Database 2021 – 2023

Gaza Training College, Gaza

Graduated with an 85.6% average

Public Secondary Education 2021 – 2022

Abu Dhar Al-Ghafari School, Gaza

Excellent, GPA: 93.3%

TRAINING CERTIFICATE

Full Stack Web Developer — UNRWA, IMT Department, HQG

Field-training certificate (Jul 2023 – Aug 2023). Evaluation: Outstanding, per the official evaluation report.
